

A collection of various surgical instruments is displayed on a blue background. The instruments include several types of forceps (long-handled, curved, and straight), a pair of scissors, and a stapler. Two inset images show surgeons in operating rooms using these tools. The background features a pattern of white dots at the bottom.

also to be used as
bandage scissors

Plaster Shears

Special features:

The construction of the open jaws avoids tiresome clogging by plaster remnants and allows furthermore an easy cleaning. The shears do not glide off the plaster owing to the deep teething on the jaws. The knives with hollow grinding have a better cutting ability and therefore less force is required. The knives are guided by ball bearings.
